## 1 Introduction/purpose

All DX-D systems except DX-D 500 are delivered with grids manufactured by JPI. To prove uniformity and quality at the time of shipment, each grid is inspected by the manufacturer and an X-ray is taken to capture the results.

Up to now, an X-ray film is delivered with each grid as proof of quality and stored on site. From August 2013, this film (35 x 43 cm) is replaced by a DICOM image on a CD. This CD is stored in the same way as the film.
