|:---|:---|
| **After completion of your task the following entry in your Service Report is required:** | **DD+DIS279.10E** \* |
| \* Insert the document number into the field "Comment" (SMS form). | |

Purpose of this document:

This document informs about an intermediate approach how to provide up to date information of the DR Detector in a fast way.

# 1 Introduction

NOTE:

The DR Detector Service Manual for the DX-D 100 is included in the appropriate chapter of the DX-D 100 Service Documentation.

In addition to the DX-D 100 Service Documentation R&D representatives provide additional DR Detector information. An intermediate approach has been set up to distribute this information via a FTP Server partition.

For details how to obtain this information via the FTP Server, see section 2.

# 2 FTP Server Access Prerequisites

PREREQUISITES:

- Broadband internet connection
- FTP client like CuteFTP, WSFTP, Filezilla, SmartFTP or any similar application

# 3 FTP Server Access

(1) Open your FTP client.
(2) Connect to the FTP server using following data:

| Host | ftp.agfa.be |
|---|---|
| User | Varian-10x |
| Password | Detector |
| Port | 21 |

(3) Check for latest DR Detector information.
    This is indicated via `<Date>`.
(4) Select and download file.
(5) Be aware of the provided DR Detector description.

**IMPORTANT:**

If a connection via FTP client cannot be established try different 'passive transfer mode' settings for your FTP client.

**NOTE:**

*For Agfa employees only:*
From outside Europe there can be connection problems using the Agfa VPN.
Do **not** download files over the Agfa VPN. Instead connect the FTP server directly from the internet.

**NOTE:**

Check regularly the FTP Server for latest information.

# 4     Keywords

- DR Detector
- FTP Server

# 5     Version History

| Version | Change | Date |
|---------|--------|------|
| 1.0 | Initial Version | 10-2010 |
